

# Pick Your Blend. Build Your Momentum.

## Introducing Fast Track Allocation Blends!

With the Rev Fixed Index Annuity™ Product Line, you have control over how your Accumulation Value is allocated across the available Fixed and Index Strategy Options.

### Two Ways to Allocate

#### → Option 1: Select a Pre-Defined Allocation Blend

1. Choose your index: S&P 500® Index or S&P 500® Dynamic Intraday TCA Index
2. Select your Allocation Blend, and we'll pre-populate your Fixed or Index Strategy allocations based on the blend. You can make changes if needed.

#### → Option 2: Build Your Own Allocation Blend

Prefer to customize? You can manually allocate your Accumulation Value across any available Fixed or Index Strategy Options. (Allocations must be made in whole percentages and total 100% of your Accumulation Value.)

Note: Your allocation selection automatically carries forward each year unless you contact us to make changes.

### Meet the Allocation Blends

#### Balanced Blend

*Steady crediting. Consistent momentum.*

##### Allocations:

- 50% Fixed Strategy Option
- 50% Guaranteed Cap Rate Index Strategy Option

##### Purpose:

Designed to deliver steady annual crediting while still providing an opportunity to participate in positive index returns.

#### Diversified Blend

*More upside. Still grounded.*

##### Allocations

- 30% Fixed Rate Strategy Option
- 30% Cap Rate Index Strategy Option
- 20% Par Rate Index Strategy Option
- 20% Par Rate After 5% Index Strategy Option

##### Purpose:

Designed for clients who want a fixed strategy with a guaranteed credit, but also index growth potential. This blend includes a fixed strategy designed to help support annual crediting, a cap strategy, and two participation strategies.

#### High Participation Blend

*Built for pursuit.*

##### Allocations

- 50% Par Rate Index Strategy Option
- 50% Par Rate After 10% Index Strategy Option

##### Purpose:

Designed for clients focused on participation potential in stronger market years. This blend generally offers the highest two participation rates, targeting years with strong index performance by participating in positive index returns, with the potential for even greater participation when returns exceed 10%.
