

Excelera Plus MYGIA™

The Excelera Plus MYGIA provides the greater of a 4% fixed interest rate or an indexed-linked return subject to a participation rate.

How often would the indexed-linked return exceed 4% historically?

See the below examples.

*The percentages are not returns. They reflect the percentage of time the index-linked return (subject to the stated participation rate) would have exceeded a 4% fixed interest rate over the stated 10-year period based on a new term beginning each business day during the Start Date Range and ending after the applicable term (3, 5 or 7 years). These hypotheticals use the historical performance of the S&P 500® Index, which likely will not be repeated. Excelera Plus MYGIA was first offered for sale in certain states in 2023. The above hypotheticals do not reflect actual product returns as the Excelera Plus MYGIA was not available during the date range. Rather, the hypotheticals reflect past outcomes based on the same calculations and formulas used by the Excelera Plus MYGIA and were created only for purposes of example. Actual performance on future product sales could be higher or lower. Individual results may vary. Data source: S&P 500® from January 1, 2007 - January 1, 2023. The 4% Guaranteed Fixed Rate is subject to change at any time prior to contract issue.

Aligning your premium's growth potential with a renowned index like the S&P 500® could strengthen and help diversify your retirement portfolio.

What is the role of the S&P 500® Index within Excelera Plus MYGIA?

The Excelera Plus MYGIA has a growth component that provides an opportunity to earn greater credited interest than the guaranteed fixed amount stated in the contract. How much additional credited interest is based, in part, on the performance of the S&P 500®. This is referred to as the Best Interest Crediting** feature.

What data points are used to calculate Best Interest Crediting?

- ✦ S&P 500® index ending value on the day the contract was issued
- ✦ S&P 500® index ending value on the last day of the initial guarantee period
- ✦ Participation rate set at contract issue and is guaranteed for the term of the contract

What Best Interest Crediting rate of return should I expect to achieve?

The rate of return from the Best Interest Crediting feature depends on the future performance of the S&P 500®. Therefore, the exact rate cannot be determined until the guarantee period ends. However, Excelera Plus MYGIA guarantees that your credited interest will not fall below the guaranteed fixed interest rate of return set at contract issue.

Important Disclosures

**The Best Interest Crediting feature available on the Excelera Plus MYGIA is based on a comparison of the S&P 500[®] index value at the start of the crediting period to the index value at the end of the period. The percentage change, if positive, is multiplied by the applicable participation rate. The resulting value is then compared against a value based on a guaranteed fixed rate to determine the final amount credited to your annuity. You do not invest directly in the S&P 500[®] Index.
